

The AI Agent Marketplace: From Workflow to ROI in ≤48 Hours

A curated library of production-ready AI agents for SaaS companies. Plug-and-Play Agents Managed by Netsmartz.

The Automation Bottleneck

Vision without execution is just a hallucination.

SaaS leaders know AI can transform operations, but they face a harsh reality:

70% of AI proofs-of-concept fail to reach production.

Internal teams are **too stretched** to integrate AI into existing systems (CRM, ERP).

Hiring an AI engineer is a **\$180k+** gamble with a 6-month ramp-up.

The result? You watch competitors automate while you remain stuck in the pilot phase.

The Solution: The AI Agent Marketplace

Netsmartz gives you instant access to a library of pre-built, role-specific AI agents. These are not just models; they are fully integrated, managed, and production-ready digital workers designed to automate specific workflows.

What you can deploy immediately:

The AI Adoption Scorecard

We don't start with a sales pitch. We start with a diagnosis. The AI Adoption Scorecard is a 10-minute executive assessment that reveals:

- Your **AI Maturity Level** (Curious, Experimenter, Operator, Leader).
- The specific workflows where AI can deliver the **fastest ROI**.
- A personalized list of **agents you can deploy immediately**.

The Core Deliverables of the Marketplace
